*Author Name, Institute, E-mail:*

*Further Author Name, Further institute, Further E-mail:*

## Abstract

*Place a short summary of the contents of your contribution here.*

*Keywords:* Please enter some keywords here.

The text of your contribution starts here.

## 1 Headings

Three levels of headings are supported. Please use \section, \subsection and \subsubsection.

### 1.1 Heading level 2

This is an example of a \subsection.

#### 1.1.1 Heading level 3

(\subsubsection) will look like this.

References may be cited using the \cite command as described, e.g., in [Mittelbach, Goossens, Braams, and Carlisle \(2005\)](#). For more information about the layout of citations see subsection 5.1.

## 2 Figures and Tables

Below you will find examples of tables. Please note and follow the special markup to achieve the desired BuR layout. Some dummy text demonstrates the usage of figures and tables.

For tables use the \tabularx environment. Additionally available columntypes are described in Table 1.

**Table 1: Additional columntypes**

Type	Description
C	centered X column
L	raggedright X column
R	raggedleft X column
d	allows vertical alignment of dots in numbers as shown in Table 2.

**Table 2: Insert your caption here**

magnim	elit	volortie	utat
tem	lor	-48.345	12
ullut	sim	-98.12	43
lortin	corper	-265.124	29
del	dolorpe	-50.0	122
tem		some text	some text
lortin	corper	-265.0	29
lortin	corper	-265.0	29
del	dolorpe	50.12	122

*Add further comments to the table here*

*Source: or a source line*

The background of table rows appears in white and gray by turns. To merge columns with gray background use

```
\multicolumn{3}{%
>{\columncolor[gray]{0.9}}columntype}
{some text}
```

as shown in row 5 in Table 2.

Wide tables are set in a \table\* environment which is shown in Table 3.

**Figure 1:** Place your caption here

Add additional text corresponding to your figure here.

## Video 1: Presentation of my First BuR Contribution

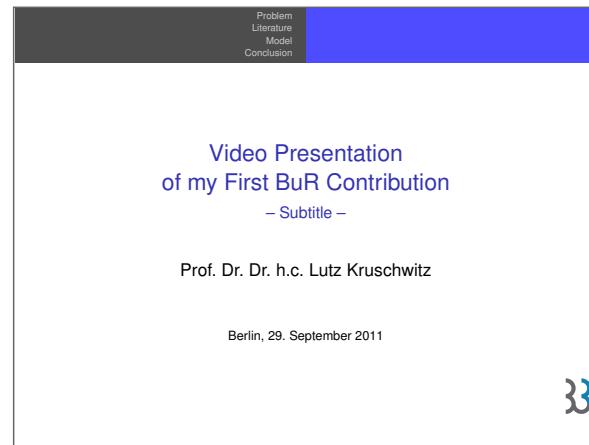

Figure environments may be misused to place other objects with heading and/or caption

invidunt ut labore et dolore magna aliquyam erat, sed diam voluptua.

## 3 Math

Business Research appears in twocolumn mode. This fact might sometimes lead to a challenging task when typesetting formulas. To provide a little more space for your formulas you might adjust the horizontal space between the formula label and the formula itself. Use in your preamble e.g.

$$(1) \quad E = m \times c^2$$

\setlength{\mathindent}{3pt}

for that adjustment.

$$(2) E = m \times c^2$$

## 4 Theorems

Use the `theorem` environment for definitions, lemmas, hypothesis etc. To create individual desired theorems e.g. “Definition” use

```
\newtheorem{definition}{Definition}
```

in your preamble. The theoremstyle `bur` then leads to the following result

**Definition 4.1 (Lorem ipsum dolor sit amet)**  
*Lorem ipsum dolor sit amet, consetetur sadipscing elitr, sed diam nonumy eirmod tempor invidunt ut labore et dolore magna aliquyam erat, sed diam voluptua.*

```
\begin{definition}[Lorem ipsum ...]
Lorem ipsum dolor sit ...
\end{definition}
```

Theorems are labeled and have an optional item in round brackets. The content of the theorem appears in italics.

## 5 Citation style and bibliography style (with BiBTeX)

The following specifications have to be used for citations or the bibliography, respectively. In case

**Table 4: For some tables alternating line colours are not appropriate**

magnim	elit	volortie	utat
tem	lor	-48	12
lortin	sim	-98	43
	corper	-265	29
	dolorpe	-50	122
tem	lor	-48	12
ullut	sim	-98	43
	corper	-265	29
del	dolorpe	-50	122

Add further comments to the table here  
 Source: or a source line

of the citation layout, the examples are followed by the BiBTeX syntax for BiBTeX users. The bibliography entries are described in appendix A. The `bur.bst` file as the style file for the bibliography works fine. No adjustments of the `.bb1`-file are necessary. If you don't use BiBTeX please be sure to provide your contribution with the specified layout. Note that because of the usage of the `natbib`-package the commands `\cite` and `\citet` lead to the same result.

### 5.1 Citation style

References have to be cited by the author-year system. All hints and comments are embedded in the continuous text. Please do not use footnotes for citations. The following examples illustrate the desired style for citations:

1. If citations are enclosed in round brackets, the corresponding year is not enclosed by round brackets additionally; page reference is located after the year followed by a colon:

Lorem ipsum dolor sit amet, consetetur sadipscing elitr, sed diam ([Schanz and Schanz 2011: 349](#)).

Syntax: `(\citealp[349]{schanz2011})`

2. In case of more than one source, the sources are separated by a semicolon:

Lorem ipsum dolor sit amet, consetetur sadipscing elitr, sed diam ([Bottazzi, Hens, and Löfller 1998; Fehr and Wiegard 2003](#)).

Syntax:

`(\citealp{bottazzi1998};  
 \citealp{fehr2003})`

3. A little more work is caused by more than one source plus page references:

Lorem ipsum dolor sit amet, consetetur sadipscing elitr, sed diam ([Bottazzi, Hens, and Löfller 1998: 201-203; Fehr and Wiegard 2003: 309 et seq.](#)).

Syntax:

`(\citealp*[201-203]{bottazzi1998};  
 \citealp*[309 et seq.]{fehr2003})`

4. If the source is embedded in the continuous text and not displayed in round brackets at the end of sentence use the following style

Lorem ipsum [Abdul-Kader \(2006\)](#) dolor sit amet, consetetur sadipscing elitr, sed diam.

Syntax: \citet{abdulkader2006}

or

  Lorem ipsum [Abdul-Kader \(2006: 1701\)](#) dolor sit amet, consetetur sadipscing elitr, sed diam.

Syntax: \citet[1701]{abdulkader2006}

when page references are applied.

5. References with the same author but different years are cited as follows:

  Lorem ipsum [Albers \(1996 and 2000\)](#) dolor sit amet, consetetur sadipscing elitr, sed diam.

Syntax: \citet{albers1996,albers2000}

  Lorem ipsum [Albers \(1996, 2000, and 2009\)](#) dolor sit amet, consetetur sadipscing elitr, sed diam.

Syntax:

```
\citeauthor{albers1996}
\citeblue{} \citemany{albers1996},
\citemany{albers2000}, and
\citemany{albers2009} \citeblue{}
```

## 5.2 Bibliography style

The reference list should ideally be sorted in alphabetical order. References are provided without any indentation. The following description includes the most common types of references. Journal names are not abbreviated.

All words of a title have a leading capital letter except for articles (a, an, the), conjunctions and prepositions of up to four letters (e.g. on, of, at, to, by, and, or, but, from, with).

The references are sorted by the last names of the authors whereas e.g. "von" is not considered as a part of the last name, "von Krogh" comes before "Sureth". The articles as for example "van" and "della" are part of the last name. That means that "Sureth" comes before "Van Gogh". To get the right sorting order please use `author={Van Gogh, Vincent}` or `author={Vincent {Van Gogh}}` in your .bib-Database.

## 6 Technical hints for the bibliography

If you apply BiBTEX the reference section is produced by

```
\bibliographystyle{bur}
\bibliography{bur}
```

To run BiBTEX properly, you have to provide a database that includes the cited references. Here the name of the bib-file has to be *bur.bib*.

When not using BiBTEX use the following syntax for the reference section

```
\begin{thebibliography}{} 
\item{Reference 1}
\item{Reference 2}
\end{thebibliography}
```

In this case no separate database is needed. However, be sure that just the cited literature is included in the reference section.

## Biographies

**Alexandra Maßbaum** is doctoral student and research assistant at the Chair of Business Administration, esp. Business Taxation at the University of Paderborn. She received her diploma degree in Business Administration with specialization in accounting, taxation, auditing, and management accounting, as well as corporate and tax law from the University of Osnabrück.

**Caren Sureth** is Professor and Chair of Business Administration, esp. Business Taxation since 2004 and also Head of the Center for Tax Research at the University of Paderborn. She received her doctorate from the University of Bielefeld, where she also reached her habilitation. She studied Business Administration, English, French, and Chinese and received her Diploma Degree at the University of Passau. Her main fields of research are the impact of taxation on entrepreneurial decisions, tax planning and taxation under uncertainty.
